1. Introduction

 Project harmlesscoin was created on 16 October 2019 with the goal of being a decentralized harmless token in the blockchain space.

 harmlesscoin is an Cardano utility token used within the Cardano ecosystem to empower a decentralized community building at the forefront of web3.

 harmlesscoin is for everyone, that can be used as a payment method on Cardano DEXes, it is safe and future-proof.

 harmlesscoin is scarce and one of the first tokens that switched from Ethereum to Cardano.

 you just want harmlesscoin in your portfolio! Stay harmless..

2. Why Cardano?

In 2019 harmlesscoin started as a project on the Ethereum blockchain. Started as a small project, harmlesscoin is gaining popularity. With this in mind we moved over to the Cardano blockchain in 2021, to archive our goals and to be ready for the future.

- ✓ harmlesscoin want to be high degrees of decentralization and security
- ✓ harmlesscoin want to be green: Proof of Stake instead of Proof of Work
- ✓ harmlesscoin chooses the Cardano blockchain for low energy, low transaction fees, fully decentralization, security and scalability

Read <https://www.trality.com/blog/cardano-versus-ethereum> if you want the full substantiation why we switched from Ethereum to Cardano.

3. How to get HARM?

HARM token is **only** available at Minswap DEX (<http://www.minswap.org>) and you can obtain it with an Cardano wallet. To get HARM token please follow this guide:
